# FULWOOD'S Frost-Proof CABBAGE PLANTS

*Ready September 1 to June 15*

CHARLESTON or LARGE WAKEFIELD

## CHARLESTON or LARGE WAKEFIELD

71 days. Desirable for home and market garden. Head broad heart-shaped, 8 inches broad at base, firm, commonly weighing 4 to 5 pounds. Fully a week later; heads larger and broader heart-shaped than Early Jersey Wakefield.

## GOLDEN ACRE

62 to 64 days. The earliest round-headed Cabbage; especially valuable for early market and shipping. Plants very small and compact; stem short; heads uniformly round, firm, commonly 6 inches in diameter and weighing 3 pounds. This is similar to Copenhagen Market but is several days earlier and the heads are smaller. It is practically as early as Early Jersey Wakefield.

**SPECIAL NOTICE:** I buy Cabbage Seed from Ferry-Morse Seed Co. and therefore have plants grown from the very best seed stock to be had in this country. Since Copenhagen Market is a variety that requires special care, I maintain a growing station at Palatka, Florida. Growing plants both here in Georgia and in Florida as we do, we can plant seed every month in the year and assure you, at all times, fresh growing plants that will produce excellent crops.

## COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as Jersey Wakefield. The stem is short, and the large, round, solid head has few outer leaves. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing 3 to 3½ pounds, produces headed Cabbage 70 days after plants are set out.

## FERRY'S ROUND DUTCH

71 days. Splendid for home and market garden. Plants small and compact; stem short. Heads almost ball-shaped, commonly 7 to 8 inches in diameter and 6 inches deep, weighing 4½ to 5 pounds. Firm and of high quality. Slow to produce "seeders."

# FULWOOD'S GENUINE FROST-PROOF PLANTS

*Ready September 1 to June 15*

## WILT-RESISTANT VARIETIES

WISCONSIN ALL-SEASON

### MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important midseason yellows-resistant variety for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Matures heads 70 days after plants are set out. Somewhat larger head than Copenhagen, but the same shape.

### GEORGIA BLUE STEM COLLARD PLANTS

These are very much like Cabbage plants. They grow from 2 to 3 feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

### CABBAGE COLLARD

Cabbage Collard is somewhat like the Georgia Blue Stem except that it makes a small head somewhat like a Cabbage. You crop and eat the under leaves, as you do the Georgia Blue Stem Collard. It takes about 60 days after plants are set before Collard leaves are ready to eat.

### WISCONSIN ALL-SEASON

This is a yellows-resistant str in developed at the Wisconsin Experiment Station by selection of healthy plants of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities, and it is well adapted for kraut and for winter use. Makes heads in 85 days, weighing 6 to 8 pounds.

"We received the tomato plants in fine shape. Thank you."

—MRS. C. E. WATTS, Chetopa, Kans.

"The plants I ordered from you last year were the best I have ever had. I received them in perfect condition. Had the earliest and best tomatoes on the market throughout the season and outsold all our competitors. Don't forget our price list."

—JOHN R. DUMMETT, Sugar Grove, Ill.

"Plants ordered from you arrived in excellent condition. This is the first year I have ordered from you but you can depend on my business in the future. For years I have ordered southern plants but the ones received today are the best ever."

—LEE S. MURPHY, Unadilla, N. Y.

# FULWOOD'S

## *Genuine*

### FROST-PROOF

# ONION PLANTS

*Ready September 1 to June 1*

There is a very short crop of Onion seed, but we have three good varieties to offer. In ordering, be sure to state first and second choice.

Because they are grown in the open field and are subject to light frosts during the growing period, our Onion plants are frost-proof and will stand temperatures as low as 18 to 20 degrees above zero without injury. Onions grown from Fulwood's Genuine Frost-Proof Onion plants are also an excellent money crop, as they can be marketed early. They are larger, do not run to seed, and will also keep much better when cured and stored.

These Onion plants should be set out at the same time as Cabbage plants, and you can order them for shipment at the same time.

## **SWEET SPANISH**

The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber-orange; small neck; globular.

## **CRYSTAL WAX BERMUDA**

Probably the best-selling Bermuda Onion on the market because of its exceptionally attractive appearance. It looks much like the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

CRYSTAL WAX BERMUDA ONION

YELLOW BERMUDA ONION

## **YELLOW BERMUDA**

This is the most widely planted of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market. It is a large producer and a real money-maker. Whether grown for marketing or for your own table, you can make no mistake in ordering this variety.

### FROST-PROOF PLANTS

#### FULWOOD'S BEET PLANTS

**Crosby's Early Egyptian.** This is probably the most popular Beet grown. I specialize in this one variety because it is the finest all-round home-garden and market Beet, and can be grown in all localities successfully. Have an extra-early crop by ordering these plants.

# FULWOOD'S Certified Tomato Plants

READY APRIL 1 TO JUNE 15

## *Three Most Popular Varieties for Shipping, Home Gardens, and Canning*

My Tomato plants, grown on new land from Certified seed, are certified by the State of Georgia. I grow each season four hundred acres of Tomato plants. They are grown in the open field and when shipped are 8 to 10 inches tall; they are field hardened, stocky, and well rooted. Each bundle of 100 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express, and will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over.

The fact that the seed is planted here in February and

March gives the plants a chance to become acclimated and toughened by outside temperatures. When set farther North they will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home-grown or hothouse plants. I ship these plants to every part of the United States, and have been shipping large quantities to market gardeners and truckers for thirty-six years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of my Tomato plants every season. Send me your order for some of these fine plants. You will be more than pleased with the early profitable crop they will produce.

### **GREATER BALTIMORE**

is similar to Stone, heavily productive and very valuable for canning. The large, scarlet-red fruits commonly weigh 6 ounces; they are deep but flat, smooth, very firm and solid.

### **MARGLOBE**

is a splendid type for earliness and uniformity. It is particularly valuable for shipping; definite disease-resistance recommends it for use in sections infested with fusarium wilt and nail-head rust. Plants thrifty and heavily productive, bearing over a long period. Fruits uniform deep scarlet, large, globe shaped; smooth, solid and of distinct quality.

### **RUTGERS**

is highly recommended as a second-early variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

## FULWOOD'S Improved PORTO RICO SWEET POTATO PLANTS

Southerners who know their yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who think of Sweet Potatoes as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder, keeping especially well. Northern markets and curing houses pay top prices for this variety.

# Insect Control

NOW MADE EASY BY NEW METHOD

## FULWOOD'S *New Rotenone Dust*

**Kills by contact and stomach poisoning. (Not harmful to man.)**

Fulwood's New  $\frac{3}{4}$  of 1% Rotenone Dusting Powder is effective for the following pests: Cabbage Worm, Diamond Black Looper, Leaf Tyer, Cabbage Lice, Mexican Bean Beetle, Colorado Potato Beetle, Tomato Bug, Asparagus Beetle, Tomato Hornworm, Bean Leaf Hopper, Flea Beetle, Thrips, Celery Leaf Tyer, Gay Rose Bug, Web Worms, Plant Lice.

**FULWOOD'S NEW ROTENONE DUST** should be applied in dry weather. The plants, however, need not necessarily be dry, as its effectiveness is not lost on wet plants. The maximum kill is obtained in one to three days, according to weather conditions.

A good hand or power duster of the usual type is satisfactory for use.

For best results plants should be dusted as soon as pests appear. It is advantageous to dust at regular intervals about every seven days. Proper application and as complete coverage as possible helps in securing successful control of the pests. Both lower and upper sides of the plant growth should be thoroughly dusted. The kind and age of the plants will determine the amount of dust required. The quantity will vary from 15 to 25 pounds per acre.

We guarantee the composition is accurately stated in the analysis on this package. There is no guaranty or warranty either expressed or implied as to results to be obtained from the use of these goods. Climatic and soil conditions and other factors beyond the seller's control necessarily affect results. The buyer agrees that the seller shall not be responsible or liable for injuries to crop, soil, person or property arising out of the use or handling of this material whether in accordance with directions or not.

## PLAY SAFE WITH FULWOOD'S

## Guarantee

### 36 YEARS OF SATISFACTORY SERVICE

I guarantee all of my plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled approximately 50 to bundle and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify me within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

I send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall I be responsible for any amount beyond the purchase price.

*P. D. Fulwood*

# FULWOOD'S Genuine Frost-proof Plants

● Vegetables sold early in the season bring many times the price of those marketed several weeks later. Fulwood's Genuine Frost-proof plants produce from two to three weeks before home-grown plants—and that's why they are real money-makers for the buyer.

● Here at Tifton, Georgia, the soil and climatic conditions are ideally suited for growing tough, hardy, healthy plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight or ten weeks old they are extremely tough and hardy. In this condition they can be shipped farther north and be planted in the open field there a month or six weeks earlier than home-grown, hotbed, or coldframe plants.

● These Frost-Proof plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet, or snow after they have been planted will not injure them unless the temperature gets below 18 to 20 degrees.

● Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, they are able to make large, extra-early crops—all ready for market during the time prices are high.

Plant your garden with Fulwood's fine field-grown plants.

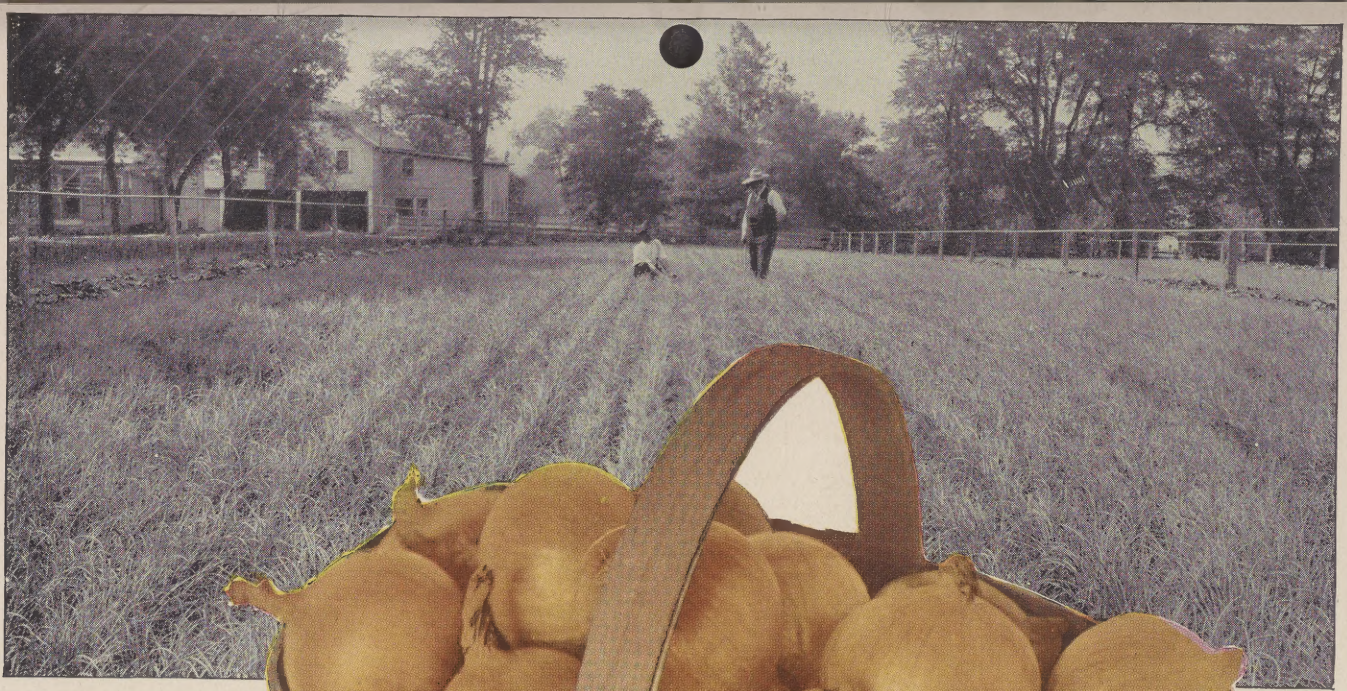

## PLANTING CHART

Fulwood's Vegetable Plants	Fulwood's Special Selected Varieties	Hardiness as to cold	Width of row in feet	Distance apart in drill in inches	Plants to set 100 to 150 ft. of row	Plants to set one acre
Cabbage	(in order, early to late) Early Jersey Wakefield Copenhagen Market Charleston Wakefield Early Flat Dutch Golden Acre	Frost Proof	3'	18"	100	Flat Dutch: 10,000 Others: 12,000
Collards	Georgia	Frost Proof	3'	18"	100	10,000
Onion	Yellow Bermuda Crystal Wax Spanish Valencia	Frost Proof	1½'	3"-6"	200	60,000
Beets	Crosby's Early Egyptian	Frost Proof	1½'	4"	200	80,000

Broccoli	Green Sprouting	Frost Proof	2'	24"	50	10,000
Brussels Sprouts	Long Island Improved	Frost Proof	2'	24"	50	10,000
Tomatoes	Greater Baltimore Marglobe Bonnie Best Pritchard Rutgers	Frost Kills	3'	30"	50	3,500
Sweet Potato	Porto Rico	Frost Kills	4'	12"	100	11,000
Eggplant	Black Beauty	Frost Kills	2½'	24"	100	7,000
Pepper	California Wonder	Frost Kills	3'	24"	50	15,000

**PLANTING NOTES:** When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart above for proper spacing.
